Technician Chemist Research & Development

Energy is now a key challenge: faced with a growing energy demand due in particular to the emergence of new countries in the developing world, the objective of governments is to produce more but also better.

Currently CDD CNRS, my research involves the improvement of post-combustion CO₂ capture. The vital balance between autonomy and teamwork, and the spirit of innovation and discipline are the pillars of effective work that I've worked to consolidate during my apprenticeship.

My other academic and professional experiences have allowed me to use my skills in organic and analytical chemistry in very different sectors: pharmaceutical, laboratory quality control and energy industries. Able to adapt easily and aware of the ability of work to do, I would have the opportunity to demonstrate my determination.

My professional desire is to put together my scientific skills in the service of the environment as well as research and development of new technologies related to energy sector.

Work experience

Since
December 2009

Organic Synthesis Chemist Technician

Mission: Synthesis of amines Demix for CO₂ capture (Acacia Project)

January 2009
July 2009

Chemist Technician R & D

Mission: Search for new solvents (amine solutions) applied to the processing of natural gas for CO₂ capture in the department Separation

August 2008
December 2008

Chemist Technician R & D

IFP New Energy

Mission: Synthesis of type catalysts Silica-Alumina and Zeolites in the Department of Materials Engineering Divided

Diplomas and education

September 2005
June 2008

Université Claude Bernard Lyon I

OTC Chemistry

September 2004
June 2005

Lycée Mermoz

1st year Class Preparatory TPC (Technology Physics and Chemistry)
Montpellier

September 2000
June 2004

School MARTINIÈRE TERREAUX

Bachelor of Technology Series STL Chemistry Laboratory and Industrial Processes - (with honors)

Computing skills

Software

Office 2007, Photoshop Chemdraw; MestrecC NMR; Galaxy

Language skills

English

Speaking competence: Fluent, **Written competence:** Fluent

Various

Traveling

Nordic countries (Sweden, Norway ...) Greece, Spain, Sardinia, Sicily, Amsterdam and London

Photos, Drawing, Painting

That 10 year loan that I design and photography for your viewing pleasure.
