Engineering undergraduate

My ultimate objective is to be in a career which utilises all my abilities and offers the opportunity to enhance them. This may be in the field of chemical engineering, of which I am currently in study of, or in a sector that can consistently engage the skills I have such as the financial sector. In any case, I seek to involve myself in an organisation that is committed to progress and results, finding solutions to problems that exist in the world today and in the future.
